iPortal™

iPortal™ Mouse Mover + Accessibility, get total control of your world!

A simple but pioneering solution that gives wheelchair users the ability to access personal computers, portable computing and Apple iOS devices from their power wheelchair controls.

- Get the ultimate control of your world with iPortal™ Mouse Mover + Accessibility
- Take control of your PC or Mac, iPad, iPod touch or iPhone from your power wheelchair using your joystick or speciality input device like head array.
- No more stylus pens or typing sticks.
- Once initial setup is done, just roll up to your computer and start working.
- Easy to set up and easy to use, no reprogramming of your remote.
- Ideal for users with impaired hand control who are unable to easily use computers or mobile phones .
- Works with Windows, Mac and Linux systems.
- Works with tablet computers that will operate with a standard Bluetooth wireless mouse.
- Works with iPhone 3GS and later, iPod touch 4 and later and iPad
- Available exclusively on Dynamic Controls' Shark*, DX and DX2 range of power wheelchair controllers.

** Requires the installation of a switch wired to the Shark power module*

Picture this...

You are in the lounge watching TV, surfing the channels using iPortal™ Accessibility and your iPhone with IR dongle.

Your son comes in and asks for help with a school project that is due tomorrow! So you turn off the TV and drive your power wheelchair through to the study. Using your head array, change iPortal™ to Mouse Mover mode and automatically connect to your laptop. Together you start searching the web for information on the solar system. Finding some great pictures, you insert them into a Word document and print it out for him.

Your iPhone beeps, you change back to Accessibility mode and open the text message. Its from your daughter saying she is going to be home late from school. You type out a short text message using your wheelchair controls reminding her that she has soccer practice tonight and not to be late.

With the kids now sorted, you find a spot by the window in the sun and using iPortal™ browse your favourite online magazine on your new tablet you got for Christmas.

It's a little warm, so using iPortal™ Accessibility and the environmental controls App on your iPhone, you turn the air conditioning on and set the temperature to a pleasant 19°C.

Now imagine doing all this without iPortal™....
